REPORT
OF THE
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL
For the Year Ending December 31st, 1885.

To his Excellency S. D. McENERY, Governor of the State of Louisiana, Ex-Officio
President of the Board of Administrators of the Charity Hospital:

Your Excellency—At the beginning of the new year, it is my pleasing duty to submit to your consideration the accompanying annual reports of the officers of the Charity Hospital, for the twelve months just ended.

The past year has been a marked one in the annals of the Institution, for it has witnessed the bringing to a satisfactory completion of the numerous improvements, the list of which has been presented in previous reports.

These improvements have all been paid for. The fact that they have been brought to a successful issue, has been presented to the notice of your Excellency in the shape of the "Report of the Building and Sewerage Fund," which was printed in pursuance with a resolution to that effect adopted by the Board of Administrators, on the 5th of October last. This Report has been very extensively circulated, in order that every benefactor of the Hospital and the public at large might become acquainted with the disposal of the Fund raised by voluntary subscriptions, for the special purposes above mentioned.

A subject of great import to the maintenance of the Institution, is the depreciation in value of the warrants allotted to the Hospital by the General Assembly of the State. As this matter is properly within the domain of the Finance Committee, the

zeal of whose members has made them fully realize its bearings upon the welfare of the many sufferers receiving the benefits of treatment at the Hospital, I will not intrude my views upon this question further than to assure your Excellency that I most heartily concur in the recommendations they see fit to make, because so large a loss of revenue cripples the utility of the Institution to a degree which it is impossible to estimate.

In the Report of the House Committee, your Excellency will find the detailed statement of the several works of domestic improvement begun and carried to a conclusion during the year 1885.

On January 1st, 1885, there were 647 patients in the Hospital; during the year, there were 6143 admissions, and 5212 discharges, leaving 556 sick and convalescent inmates in the House, on December 31st, 1885. There occurred 1005 deaths during the year, making the death rate about 14 per cent. The out-door clinic continues to grow in importance, there having been 13,585 individuals who thus received the benefits of the Hospital during the year 1885, as against 10,604 who were similarly relieved in the twelve months preceding.

Since the last Annual Report, the Hospital Library has received some valuable contributions. Owing to the importance of this work, and with the hope that the friends of the Hospital will assist the Board of Administrators in their desire to enlarge the sphere of utility of the Library, contributions of medical works, or others, bearing upon kindred branches of science, are most earnestly and respectfully solicited.

In mentioning the valuable services rendered the community by the Charity Hospital Ambulance Corps, a meed of praise is due the Resident Students of the Hospital for their willingness and promptness in answering calls for the Ambulance, and for their careful attention to duty. The Board of Administrators, solicitous for the welfare of the Students residing at the Hospital, and finding that the sleeping quarters

provided for the use of certain of these gentlemen are lacking in sanitary requirements, propose remedying this defect at a very early day. The Board have also under consideration the propriety of erecting stables and dependencies for the care of the horses and Ambulance wagons. There can be no question as to the necessity for the construction of these buildings, whose completion, whilst advantageous in an economical point of view, will also tend to enhance the value of the Ambulance Service, the benefits of which have already strikingly impressed themselves upon popular sentiment in the community.

Doctor David Jamison, Assistant House Surgeon, has recently tendered his resignation of that position. In parting with Doctor Jamison, the Board of Administrators were happy at the opportunity offered them of signifying to that gentleman their appreciation of the services rendered by him to the Hospital. Doctor F. W. Parham was elected to fill the vacancy caused by Doctor Jamison's withdrawal.

The Pathological Department, under the guidance of its Director, Doctor H. D. Schmidt, has again proved the wisdom of its foundation. The character of the work which is being carried on daily and noiselessly in this department, renders it of great value to the practical workings of the Hospital; and the shelves of the Museum are filled with specimens and preparations which are useful for study, as well as for the history of the evolution of disease.

The interior management of the Hospital during the past year reflects that credit upon the good Sisters in charge, which they do not seek, but which the Board of Administrators gratefully recognise.

The government of the Hospital has been greatly facilitated by the good will shown in its behalf by every person connected with the Institution. The Board of Administrators are thankful to the House Surgeon and his Assistant, the Staff of Visiting Physicians and Surgeons and the Resident Students for their

zealous co-operation. The assistance rendered by the Secretary and Treasurer, who so carefully discharges the duties of his position, is cheerfully acknowledged.

The Report of the Clerk speaks for itself, showing, as it does, how scrupulously the records of the Hospital are kept.

The Druggist, the Engineer, and the remaining attendants of the Institution are also deserving of thanks for the fidelity and care displayed in their several departments.

Renewing the reference made above to the matter of the State warrants received by the Hospital, your Excellency's interest in the welfare of the Institution has been so frequently manifested, that my colleagues and myself feel assured this subject will meet with your attention and favorable consideration.

I have the honor of subscribing myself your Excellency's humble and obedient servant,

THOMAS LAYTON, M. D.,

Vice-President.

REPORT OF THE SECRETARY AND TREASURER.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
New Orleans, January 4, 1886. }

To the Vice-President and Board of Administrators:

Gentlemen—In presenting the usual Fiscal statements for the past year, I beg to call your attention to the following matters:

STATE WARRANTS.

At the commencement of the year the Hospital had on hand, pledged to the Banks, \$43,750 of warrants of 1884, which were sold February 16, 1885, at eighty cents on the dollar, or a discount of twenty per cent—say :..... \$8,750 00

On the 18th November, 1885, we closed out the entire issue of warrants of 1885, \$47,500, at sixty-six cents on the dollar, or a discount of thirty-four per cent—say :..... 16,150 00

making in all a loss to the Hospital on the face appropriations, of..... \$24,900 00
besides several hundred dollars for interest to Banks for loans.

AMBULANCE SERVICE.

This account shows a credit from all sources, principally donations, of \$4,618 20; and a debit, including cost of ambulances, harness, horses, feed, wages of drivers, etc., of \$4,214 89. leaving a net credit on the account of \$403 31.

BUILDING AND SEWERAGE FUND.

This fund, after an appropriation to it of \$6,651 71, the past year, from the means of the Hospital, has been finally closed, and forms a separate publication, which has been given to the

public. The total amount contributed out of the General Fund of the Hospital, is \$37,494 23.

THE TABLES OF RECEIPTS AND DISBURSEMENTS.

These tables embrace a period of twelve months, say from December, 1884, to November, 1885, inclusive, leaving the bills for December, 1885, unpaid, the latter being exigible January 12th, instant.

LEGACIES.

| | |
|--|---------------|
| The Hospital has not as yet been paid amounts left it by | |
| Mrs. Charlotte Piffet, deceased..... | \$3,000 |
| One-half amount of the legacy left it by Mrs. Caroline E. Simms..... | 250 |
| | <hr/> \$3.250 |
| In addition, Jules Cassard, Esq., recently deceased, | |
| leaves to it..... | 3,000 |
| Making a total amount to be collected of..... | <hr/> \$6,250 |

AUCTIONEERS' RETURNS.

This account shows a credit for the year of \$13,885 14, against an amount the previous year of \$12,363 90, showing a gain of \$1,521 24.

In conclusion, I present herewith the "Annual Statement of Receipts and Disbursements for 1885," the "Balance Sheet of the Books to December 31, 1885," the "Table of Property," etc., and "Statement of Insurance."

Respectfully submitted,

EDWIN MARKS,

Secretary and Treasurer.

REPORT OF THE FINANCE COMMITTEE.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
New Orleans, Jan. 4, 1886. }

To the Vice-President and Board of Administrators:

Gentlemen—Your Finance Committee would respectfully call your attention to the Report of the Secretary and Treasurer for the past year, wherein a statement is given of the warrant account of the Hospital for the past two years. It shows a round loss to the Hospital of \$25,000 in that time, thus pointedly indicating the serious instability of that portion of the State's appropriation.

Throughout the year just ended your attention has been repeatedly directed by your Committee to the uncertainty of this revenue, and to the probabilities of a serious financial disaster to the Hospital at any time from this cause.

Prior to the sale last November of the warrants of 1885, we received information from a high and reliable official source that the final outcome for the year would be very unfavorable, and counseling a prompt sale. Upon consultation with the Board, the sale was made. Sooner or later it will be found impracticable to maintain the Institution with safety to its financial standing, unless measures are taken by the General Assembly at its next session looking to a positively reliable appropriation on this account, so fixed that no ordinary disability of the State can change the original figures. It has become imperative in the premises for the State to take such action, and remove fu-

ture danger. In the struggle of the Board for the past year to maintain the high credit of the Hospital, some of the banks of the city have been freely used, and frequently it has been found necessary to individually indorse its paper. This should not be. The Hospital should be comfortably maintained without borrowing or straining its credit.

Respectfully,

JOHN T. GIBBONS,
H. W. FAIRCHILD,
R. SINNOTT.

EDWIN MARKS,
Treasurer.

CHARITY HOSPITAL, }
TREASURER'S OFFICE, }
New Orleans, January 4th, 1886. }

The undersigned, having been duly appointed a committee to examine the accounts of the Treasurer, for the year ending December 31st, 1885, as provided for by Article 392, Revised Statutes, do hereby report that they have made the examination as contemplated, and find the books, accounts and statements true, just and correct.

CHAS. LAFITTE,
Chairman.

H. W. FAIRCHILD,
JOS. M. RICE.

REPORT OF THE HOUSE COMMITTEE.

CHARITY HOSPITAL,
NEW ORLEANS, La., Jan. 4, 1886. }

To the Vice President and Board of Administrators:

Gentlemen—Your House Committee would respectfully report the following improvements for the past year:

FILTER, ETC.

An iron Filter, in connection with an elevated Cistern as auxiliary, has been erected in the yard. By this means we are enabled to transmit throughout the Court Buildings by water pipes recently introduced 60,000 gallons of pure clarified water each twenty-four hours, if such quantity should be at any time necessary. The water elevation is thirty-nine feet, sufficient height for the supply of the second story of the buildings.

HOSE AND EXTINGUISHERS OF FIRE.

During the past year a sufficiency of Rubber Hose has been placed at prominent points about the buildings, ready at a moment's notice to be attached to stand pipes connected with the engine room for a supply of water in case of accident from fire. There are also distributed throughout the entire Hospital some eighteen dozen of "Lewis' Hand Extinguishers," fully charged with a fluid capable of extinguishing within a few seconds any incipient fire. The chances of an extended fire within the Hospital are reduced to a minimum from these appliances.

AN AUXILIARY PUMP.

An Auxiliary Pump, to be used in event of the "breaking down" of the "Blake pump," for expelling the fecal matter

from the central tank, has been introduced in view of a possible accident.

ELECTRIC BELLS.

Under direction of Mr. John Ponder, the engineer of the Hospital, a complete system of electric wires and bells have been introduced. This system connects the Hospital Buildings, House Surgeon's office, Clerk's office, Students' rooms and Ambulance department, and which, in conjunction with the telephone, insures instantaneous attention to all calls.

WASH HOUSE.

Additional washing tanks are being placed in the Wash House and other improvements making.

ACCIDENT WARD.

The pipe leading from the Water Closet in the eastern portion of the main building and draining the same into the Central Tank, has been raised several feet, thereby permitting the use of the corner room through which it passed. This room has been converted into an Accident Ward, and therefor duly furnished and made comfortable.

A patent Steam Coffee Mill has been introduced, and proves itself a labor-saving addition.

A general inside painting, kalsomining and renovation of the Hospital Buildings has been made during the year.

Respectfully submitted,

CHS. LAFITTE,

SAM. BOYD.

PROPERTY OF CHARITY HOSPITAL,

ANNUAL REPORT OF THE HOUSE SURGEON.

CHARITY HOSPITAL, January 4th, 1886.

To the President and Board of Administrators:

Gentlemen—I have the honor to report on the medical management of the Hospital, and submit the records for 1885.

MEDICAL STATISTICS.

The records comprise the tableaux required by the Statutes of the State, classifying the disease of each patient, the condition of those discharged and the deaths; also, other tables of statistical interest. The preparation of the annual statements has been so simplified by a system of Quarterly Reports as to enable us to present them now, four days after the close of the year.

At the last Annual Report, 647 patients remained under treatment. During the year, 6143 new patients were admitted, making the total of inmates treated 6790; white, 5216, colored, 1567; males, 4839, females, 1305; children (white, 78, colored, 19), under ten years, 97; deserted and unrecorded, 17.

The admissions were 1137 less than last year, owing to the general good health of the lower Mississippi Valley. For instance, there were 2972 cases of malarial fever treated in 1883; in 1885 only 1944.

The largest number of inmates at one time was 690, on the 2d of March; the smallest, 528, on the 1st of October; daily average 605; daily average of admissions, 16.

Of the 6790 inmates treated during the year, 5212 were discharged; cured, 3125, or 59 per cent.; improved, 1563, or 29 per

cent.; unimproved, 524, or 10 per cent.; remaining on the 31st of December, 556.

There were 1005 deaths, a total mortality of 14 per cent.; white, 11 per cent., colored, 24. The excessive mortality among the colored is explained by the fact that a large proportion of those applying for admission suffer of very grave diseases. For instance, the colored die of pulmonary consumption in the ratio of three to one white.

Pulmonary consumption caused 16 per cent. of the total deaths. This mortality was increased, however, less than usual, by the phthisical patients who came into the Gulf States in search of a favorable climate. So frequently have I observed the subjects of phthisis grow rapidly worse after coming into the Hospital, that I deem it my duty again to allude to the low altitude, the damp atmosphere and the variable winter weather of New Orleans as positive contra-indications in the climatic treatment of this disease.

Deducting 176 deaths, occurring within twenty-four hours after admission, the total mortality is reduced to 12 per cent. This death rate compares favorably with that of previous years, especially in view of the fact that, since so many of the acute and mild diseases are now treated in the out-door clinics, only those comparatively more seriously ill are admitted into the Hospital.

In the out-door department 12,829 visiting patients were attended. There were in addition 756 cases of accidental surgery treated in the Amphitheater, making the total of out-door patients 13,585. This is an increase of 2,981 over the figures of the last report, due to increase of the transient population in the city.

So, counting inmates, 6790, and out-door patients, 13,585, the Hospital gave relief during the year to a grand total of

20,375. No Hospital of my acquaintance gives relief to as many patients with the same amount of revenues at command.

OUT-DOOR DEPARTMENT.

The out-door clinics are intended only for the poor; some, whose injury or illness does not warrant their admission; others, proper subjects for admission, who prefer remaining at their homes or lodgings, and visiting the Hospital for treatment. The out-door treatment of this latter class of patients is an economy to the Hospital. There is an abuse of this charity, as in all metropolitan cities; but the undeserving are few compared with the large number of poor people applying for relief.

The necessity of an entirely separate department for the treatment of the out-door patients is becoming more and more apparent. They are now treated in the wards in the presence of the inmates. The visiting patients, however orderly, necessarily disturb the inmates. In the large charities of the Eastern cities, the out-door consultation rooms are altogether separate from the wards, and in some of the best Hospitals, in separate buildings. The time has come in the growth of New Orleans, and in the increase of the out door service of the Hospital, when a separate building should be provided, where the work of out-door relief could go on without, in any manner, disturbing the inmates. As the people of New Orleans are the beneficiaries of this service almost exclusively, the municipal government should in time contribute to the permanent establishment of a separate out-door department in connection with the Hospital. Attention is respectfully directed to this matter, that, in due time, there may be a movement in this direction.

IMPROVEMENTS ACCOMPLISHED.

At the close of each year, since the beginning of your administration, it has been my duty to report the beneficial results of alterations and additions in every department of the

Hospital. Among the more recent acquisitions to the Medical Department is an out-door consultation room for diseases of the Nose and Throat, with the special appliances necessary.

The works of improvement, itemized in my last Annual Report, viz.: the new Surgical Operating Rooms, one for the Eye and Ear Clinic, the other for the Gynæcological Service, the Reception Room for moribund patients and those admitted at night, the Annex to the Female Department, with the separate wards for the treatment of children, the new Dead-House, with the Pathological Laboratory and Museum of Pathology, the additions to the medical and surgical supplies, all have improved inestimably the medical service of the Hospital.

IMPROVEMENTS RECOMMENDED.

More elaborate electrical apparatus is required in the treatment of nervous diseases.

Means should be provided for better equalizing the temperature of the main building when heated by steam. This is a matter of sanitary importance as well as comfort to the inmates. The steam radiators are now placed only in the halls, which are often overheated, while the wards remain uncomfortably cold. Additional radiators should be placed in the wards, or free communications by gratings or transoms should be made between the halls and the wards on either side.

In connection with the sewer system, the water closets and bathing facilities require complete renovation.

An extension of the Students' Dormitories, so as to remove those living in the main building into more desirable quarters, is a matter deserving early attention.

The erection of a building for the establishment of the Out-door Department as an entirely separate service of the Hospital, is strongly recommended.

True, these works cannot all be accomplished now; but these suggestions are respectfully submitted that the subjects may be well considered and plans matured for a future day.

THE AMBULANCE SERVICE.

This service, organized on the 2d of February, is working satisfactorily. Its success is due mainly to the competency of the Ambulance Corps, and the zeal with which they discharge their duty. Lives have been preserved by the prompt aid rendered on the spot in cases of poisoning and surgical accident. In the ambulance report, observe the preponderance of surgical cases.

In my judgment, the usefulness of the service and the high appreciation in which it is held as a public charity, can best be maintained by continuing the present plan of relief, under the rules and regulations first adopted. This should remain an emergency service, to render medical aid on the spot and transfer to the Hospital only the more seriously ill and injured.

The erection of an ambulance house, as now contemplated by the Board, will facilitate very much the working of the service and prepare for its permanent establishment.

ACKNOWLEDGMENTS—CONCLUSION.

In reporting favorably on the condition of the several branches of the medical service, and the work done during the year, I beg to make acknowledgments to the Assistant Surgeon, resigned December 12, and to the other officers associated with me are in charge of their respective departments.

It is a pleasant duty every year to pay the tribute we owe to the Sisters of Charity, in recognition of their unfaltering faithfulness in the discharge of Hospital duties, and commend, as it deserves, the well-ordered condition of the domestic department under their charge.

Thanks are due to friends of the Hospital for many presents and acts of kindness to the inmates. Hereafter, every contribution worth receiving, should be suitably acknowledged in the Annual Report.

Aside from my obligation to your honorable body for many acts of official kindness, I beg, in conclusion, to express the sense of appreciation, which I feel in common with all physicians, of the liberal spirit you have manifested in the promotion of every work looking to the advancement of practical and scientific medicine.

Respectfully submitted,

A. B. MILES,

House Surgeon.

REPORT OF THE PATHOLOGIST.

PATHOLOGICAL DEPARTMENT,)
 CHARITY HOSPITAL,)
 New Orleans, La., January 1, 1886. }

To the Hon. Board of Administrators of the Charity Hospital:

Gentlemen—I beg to report that the following work has been done in this department during the year ending December 31. 1885:

| | |
|---|------|
| Specimens of Urine examined..... | 1632 |
| Tumors examined..... | 62 |
| Specimens of Sputa stained and examined..... | 61 |
| Specimens of Vomit examined..... | 7 |
| Specimens of Fluids examined..... | 36 |
| Specimens of Blood examined..... | 8 |
| Miscellaneous Specimens..... | 21 |
| Microscopical Specimens permanently mounted..... | 246 |
| Microscopical Sections cut of 167 different specimens, about ten sections of each..... | 1670 |
| Pathological Specimens remounted for Museum..... | 159 |
| New Pathological Specimens mounted for Museum..... | 8 |
| Autopsies held and records kept..... | 178 |

Respectfully,

H. D. SCHMIDT,
 Pathologist.

REPORT OF THE AMBULANCE SERVICE FOR 1885.

[illegible]

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS FOR 1885.

| Operation. | Result. | | | | Total | Diagnosis. Remarks. |
|-------------------------------------|---------|----------|------------|------|-------|---|
| | Cured | Improved | Unimproved | Died | | |
| Amputations— | | | | | | 1 Osteo-Sarcoma of Humerus. |
| of Arm..... | 1 | | | | 1 | 1 Compound Comminuted Fracture of Arm and Skull. |
| of Arm..... | | | | | | 2 Laceration of Arm. |
| of Arm..... | 2 | | | | | 1 Compound Comminuted Fracture of Forearm. |
| of Forearm..... | | 1 | | | | 1 Compound Comminuted Fracture of Metatarsus. |

| | Left Sacro—Posterior..... | 1 |
| | Right Sacro—Posterior..... | 1 |
| | Uncertain..... | 1 |
| Transverse, 3 | Right Dorso—Anterior..... | 1 |
| | Right Dorso—Posterior..... | 1 |
| | Uncertain..... | 1 |
| Delivered..... | Naturally..... | 152 |
| | By Forceps..... | 14 |
| | By Manual Traction..... | 1 |
| | By Podalic Version..... | 1 |
| | By Craniotomy..... | 1 |
| | By Embryotomy..... | 2 |

MORTALITY OF MOTHERS.

Of the 176 cases, 18 mothers died, making a mortality of a little more than 10 per cent. This death rate is favorable in view of the distressing condition in which some of the cases enter the wards.

CAUSES OF DEATH.

| | |
|-----------------------------|----|
| Exhaustion..... | 1 |
| Chronic Dysentery..... | 1 |
| Malarial Toxiæmia..... | 1 |
| Post-partum Hemorrhage..... | 2 |
| Septicæmia..... | 1 |
| Puerperal Eclampsia..... | 1 |
| Puerperal Fever..... | 11 |

The Epidemic of Puerperal Fever which prevailed, was finally

controlled by kalsomining the wards, scouring the floors, renewing the bedding, and filling the rooms with antiseptic vapor.

COMPLICATIONS OF CONFINEMENT.

| | |
|---|-----|
| Delivered naturally without accident..... | 126 |
| Cord around the neck..... | 32 |
| One arm extended by the side of the head..... | 1 |
| Both arms extended by the side of the head..... | 1 |
| Laceration of perineum..... | 7 |
| Retained membranes..... | 1 |
| Retained placenta..... | 4 |
| Placenta prævia..... | 1 |
| Post-partum hemorrhage..... | 2 |
| Recto-vesical fistula from chancroidal ulcerations, the foot protruding through the anus..... | 1 |
| The number of Children born was 181. | |
| Male..... 92—Female | 89 |
| Living 157—Stillborn | 24 |

One of the children was hydrocephalic; one born with club-feet; and one, a twin, born with a caul.
